the last half century has seen an explosion in the study of late antiquity which has

characterised the period between the third and seventh centuries not as one of catastrophic collapse and decline and fall but rather as one of dynamic and positive transformation yet research on cities in this period has provoked challenges to this positive picture of late antiquity this study surveys the nature of this debate examining problems associated with the sources historians use to examine late antique urbanism and the discourses and methodological approaches they have constructed from them it aims to set out the difficulties and opportunities presented by the study of cities in late antiquity in terms of transformations of politics the economy and religion and to show that this period witnessed very real upheaval and dislocation alongside continuity and innovation in cities around the mediterranean

smart cities and the un s sdgs explores how smart cities initiatives intersect with the global goal of making urbanization inclusive resilient and sustainable topics explored include digital governance e democracy health care access public private partnerships well being and more examining smart cities concepts tools strategies and obstacles and their applicability to sustainability the book exposes key structural problems that cities face and how the imperative of sustainability can bypass them it shows how smart city technological innovation can boost citizens well being serving as a key reference for those seeking to make sense of the issues and challenges of smart cities and sdgs includes numerous case studies from around the world features interdisciplinary insights from academic and practitioner experts offers an extensive literature review

the revised and updated second edition of introduction to cities explores why cities are such a vital part of the human experience and how they shape our everyday lives written in engaging and accessible terms introduction to cities examines the study of cities through two central concepts that cities are places where people live form communities and establish their own identities and that they are spaces such as the inner city and the suburb that offer a way to configure and shape the material world and natural environment introduction to cities covers the theory of cities from an historical perspective right through to the most recent theoretical developments the authors offer a balanced account of life in cities and explore both positive and negative themes in addition the text takes a global approach with examples ranging from berlin and chicago to shanghai and mumbai the book is extensively illustrated with updated maps charts tables and photographs this new edition also includes a new section on urban planning as well as new chapters on cities as contested spaces exploring power and politics in an urban context it contains information on the status of poor and marginalized groups and the impact of neoliberal policies material on gender and sexuality and presents a greater range of geographies with more attention to european latin american and african cities revised and updated introduction to cities provides a complete introduction to the history evolution and future of our modern cities
